To Whom it May Concern,

My name is Elizabeth De Santis and I am a full-stack developer with a background in the medical field. Experience in communication and group work to reach a common goal as well as leadership experience and time-management. Recently earned a certificate in full-stack development from George Washington University. New experience on CSS, JavaScript, HTML, MySQL, MongoDB, Bootstrap, and Bulma. Worked closely with team-members on group projects. Known as a hard worker. I hope to leverage these skills to work as a part of this user driven team.
